Injecting magnitude collapses the model into a transmission pipe
(a)
family hint
DR = 0.23
slope = 0.01
family hint (constant within family)
prediction
1 pt off-axis
predicted lift
true post-hoc μ_i
(b)
series hint (pred & hint vs truth)
Pearson r(pred,μ) = 0.70
Pearson r(hint,μ) = 0.65
Spearman DR(pred) = 0.50
Spearman DR(hint) = 0.48
injected hint
prediction
5 pts off-axis
true post-hoc μ_i
(c)
series hint (prediction vs hint)
corr(pred,hint) = 0.96
83/100 within ±0.05
3 pts off-axis
predicted lift
injected hint
